

M/S MARITIME MUSEUM OF DENMARK

One of the ten museums to travel to for their stunning structures”, National Geographic writes of the award-winning M/S Maritime Museum of Denmark built by star architects BIG Bjarke Ingels Group.

Sloping floors, interactive and atmospheric exhibitions give a fascinating look into Denmark’s role in a global world – then and now. The museum is situated below ground around an old dry dock in front of Kronborg Castle.

Children can play in THE DREAM SHIP – a 400-square-metre maritime play universe that conveys the joy of the maritime and the sea through movement, play, stories and crafts.

Enjoy local delicacies in spectacular architecture in one of Denmark’s most beautiful cafes. During the summer months you can enjoy food and drinks outside in the dock. In the museum shop you will find carefully selected quality goods – Danish design, books, toys, maritime inspired clothing, postcards and gifts - all with a maritime twist.
